

XPS 13 Compact design. Infinite possibilities.

Powerful design. Deceptively small.

We cleverly fit a stunning 13.3" edge-to-edge display with durable Gorilla Glass designed for brilliant visuals in a compact body similar to an 11" laptop. It's not just magic, it's smart design.

So much punch, so little effort.

The XPS 13 packs a 3rd generation Intel® processor up to Core™ i7 and Intel HD 4000 Graphics into its slim frame (6-18mm). And here's the kicker, it weighs as little as 2.99 lbs.*

Always ready to go.

With solid state drives and Intel® Rapid Start Technology*, the XPS 13 boots from cold in as little as 13.5 seconds. And whatever state its in, it comes back in a snap, less than 1 second when it's in sleep mode. The XPS 13 also includes Intel® Smart Connect Technology which keeps your content updated* to be ready when you are.

Crafted without compromise.

The sleek and beautiful overall design is a side effect of careful performance driven construction. Machined aluminum provides strength and durability. The top cover is precision cut from a single block of aluminum. The base is surrounded with a ring of precision cut anodized aluminum to match the display back. The carbon fiber composite base helps drive its lightness. It is strong like aluminum, and thin, but feels cooler to the touch. Finally, the edge-to-edge hardened Gorilla Glass is bonded to the aluminum display back and is impeccably strong and aesthetically pleasing.

Enterprise-friendly.

Dell has made it easier for IT departments to choose laptops that offer the security and services they value in a fit and finish executives and employees on the go now demand. Optional enterprise-friendly features include Trusted Platform Module for BitLocker Data Encryption, ProSupport™** and Configuration Services such as static imaging and asset tagging.

Intel Rapid Start Technology: Requires a Solid-State Drive (SSD) or properly configured HDD + SSD.

Boot times: Based on internal testing by Dell Labs in August 2012. Actual performance will vary with configuration, usage and manufacturing variability.

Intel Smart Connect Technology: Requires an SSD or mSATA drive only and a recognized Internet connection. System must be on or in sleep mode with application running to update.

Hard Drives: GB means 1 billion bytes and TB equals 1 trillion bytes; actual capacity varies with preloaded material and operating environment and will be less.

Memory: Graphics & System Memory: GB means 1 billion bytes and TB equals 1 trillion bytes; significant system memory may be used to support graphics, depending on system memory size and other factors.

Intel Wireless Display: Requires an Intel wireless card, a compatible Media Adapter (sold separately) and an HDMI or composite AV-enabled display.

Wireless connectivity: Where wireless access is available. Additional access charges apply in some locations.

Notebook Weight: Weights vary depending on configuration and manufacturing variability.

Skype: Skype service subject to third-party service subscription terms and conditions.

ProSupport: Availability and terms of Dell Services vary by region. For more information, visit www.dell.com/servicedescriptions.
