Fujitsu PRIMERGY TX200 S7 Dual socket Intel® Xeon® processor tower server

Well-balanced price- performance

PRIMERGY TX tower servers are ideal for use in SMEs or branch offices. They increase operational efficiency by providing rock solid, record-breaking, energy efficient performance. That performance is built on 20-years of pioneering work in Green IT. As a customer, you benefit from a reduction in your organization's environmental impact and lower running costs. The reliability is proven by testing the machines through 5000 boot cycles – far more than other vendors do. PRIMERGY TX servers are also easy to manage via the PRIMERGY ServerView Suite, reducing IT admin workload and costs. Plus, tower to rack conversion kits are available for most TX systems, ensuring investment protection.

PRIMERGY TX200 S7
The PRIMERGY TX200 S7: a perfect server for SMEs, branch offices or virtualized environments in an attractive design. It offers dual processor performance combined with expandability and energy efficiency. With up to 16 2.5-inch hard disk drives, you can save on an external storage unit. The high energy efficiency minimizes costs. Moreover, a maximum of 192 GB of memory, redundancy features, and the Intel® Xeon® E5-2400 processor family performance allow you to make a great start into virtualization. The PRIMERGY TX200 S7 also lends itself as a database or communication server. A tower to rack conversion kit protects your investment's lifetime. This great system strikes the right balance between price and performance.
